## ABOUT US

HornBlasters created the train horn for your vehicle industry in 2002 and has been the industry leader ever since. Located in Florida, we manufacture and stock a wide variety of products, both foreign and domestic. As a SEMA member, we have worked closely with multiple customers, companies, and builders to supply products in every vehicle build category, both in the United States and around the world.

## YOUR ONE-STOP PNEUMATIC SHOP

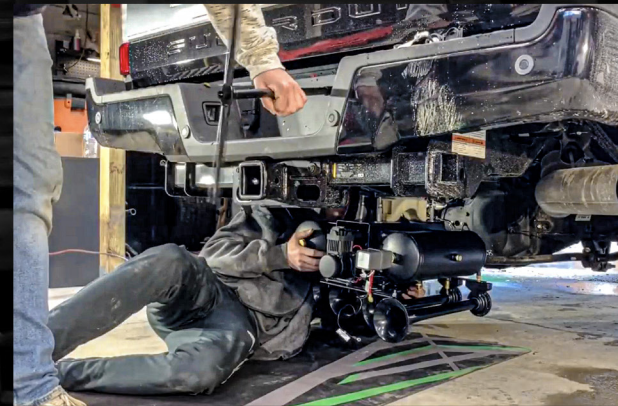

Train Horns, Air Horns, Onboard Air Systems, and Air Suspension, we have it all! We bring the real sound of a locomotive right to your vehicle and service all your pneumatic needs. Our Horn Kits are simply ridiculous and provide your vehicle with a voice on the road!

### INDUSTRY EXCLUSIVE

## SPARE TIRE DELETE

The most popular trend right now is using our Spare Tire Delete Kits! Customers with full-size trucks are ditching their factory size spare tire and replacing it with a train horn kit. The installation has never been faster or easier with the use of our special bracket that holds select Conductor's Special train horn kits.
