

RSI SMARTCAP™

Forged in Africa. **Built by you.**

How do you prepare for a month-long Safari, driving your truck and camping with your family in some of South Africa's most extreme environments? Well, if you happen to be product designer Mike Voss, you design and build a modular truck cap to help you organize gear and create the perfect platform for a rooftop tent.

SmartCap was formed out of the rugged terrain of Africa. Every inch was built to withstand the twisting and jostling of offroad trails. To be watertight during torrential flash floods and dust-proof over thousands of miles driving through the reserves — with the African dust seeping into everything it encounters. Everything that is, but the SmartCap.

THE WORLD'S FIRST
MODULAR
TRUCK CAP SYSTEM.

SmartCap is the world's first modular truck cap system. From its 5-piece stainless steel design to its seamlessly integrated accessories, the SmartCap lets you build and organize your truck bed exactly how you want it. But that's just where the benefits of this revolutionary design begin.

**CONFIGURE
ONLINE**

Order online or visit an authorized dealer.
Purchase the SmartCap or SmartAccessories online and have them shipped directly to your home or to an authorized dealer.

**DELIVER TO
YOUR DOOR**

**OR AUTHORIZED
DEALER**

Damage a section? Replace it.
If you damage the stainless steel roof, sides, front, or back, just replace the damaged section and voilà! Your SmartCap is as good as new.

**INSTALL IN
UNDER AN HOUR**

FEATURES

RSI SMARTCAP™

Forged, not sprayed.

Forged from automotive-grade stainless steel, the SmartCap EVO is arguably the strongest truck cap ever designed. It'll hold 330 lbs of gear when moving down the road and a whopping 770 lbs parked while you saw logs in a rooftop tent under the stars.

For men of steel, not fiberglass.

When you build a truck cap out of steel and not fiberglass, you have the confidence it's been built to withstand the daily abuse you'll give it. From off-roading to the job site, SmartCap is one heck of a rugged truck cap.

It's a door and so much more.

The Gullwing Door openings are around 17% taller than the average side window you'll find on a fiberglass canopy — making it that much easier to access cargo or bolt in a SmartAccessory.

Push button access.

The design of the low profile latching mechanism seamlessly flows into the SmartCap door and can be opened with just the push of a button. Plus, all six locks are keyed alike for maximum security and easy access.

Rain, snow, freezing temperatures? Bring it!

Our 5-piece design includes an innovative sealing method that, when properly installed, makes the SmartCap weatherproof. So when Mother Nature descends with torrential rains and wind followed by snow and freezing temperatures — your cap will remain water-tight and your cargo dry as a bone.

Road-dust, schmo-dust.

The Positive Pressure Air Vent filters fresh air into the cap at a greater velocity than the enclosed bed is trying to suck it back in. This keeps road dust outside of the bed rather than all over your stuff.

Mount up.

Sleekly designed into the top of the SmartCap, our integrated Roof Rails allow you to utilize other SmartAccessories for mounting roof-top tents, bikes, kayaks, ladders — you name it. Plus, if you already own a rack system, no problem. Their universal design allows you to mount just about anything.

Built like a truck, not like a boat.

Forged from steel (not fiberglass), it could be said the SmartCap EVO is built like a truck, not a boat. From off-roading to the job site, it'll withstand the daily abuse you give it, while also being able to hold up to 330 lbs when moving or 770 lbs when parked.

But this bruiser's more than brawn. From its modern angular design to the bonded glass Gullwing Doors with low profile push-button latching mechanisms to the sleek integrated roof rails, the SmartCap EVO enhances the rugged look of your truck.

FEATURES: (In addition to the key features on page 5)

Put it on. Take it off. Put it on. Take it...

The stainless steel SmartCap EVO can be removed in under 15 minutes, giving you the ability to haul taller loads. Then when you're ready to put it back on — snap! It's back on in a jiffy.

Easy access from the cab? Included.

Whether you're parked on the side of a mountain or driving down the interstate, when you need something, you need it. That's why we include a cab slider window as a standard feature on all EVO Leisure caps.

Open and shut case.

The flush-mounted sliding window on the Gullwing Doors provides excellent ventilation for the enclosed truck bed. Choose from four lockable positions to achieve your desired air-flow. So go ahead, take that second helping of Aunt Betty's Famous Baked Beans, we've got you covered.

Real attention grabber.

The SmartCap incorporates a high mounted third brake light that's a real attention grabber when slamming on the brakes to let Nana and her 'lil Tater shuffle across the intersection.

WEATHER PROOF

STAINLESS STEEL

EASY REMOVAL

3 YEAR WARRANTY

Commercial grade — modular design.

When South African telecom companies first saw the SmartCap EVOc, they knew they'd found the ideal solution to never having to fix damaged fiberglass again — and for good reason. Not only did it solve the fiberglass problem, but when one of their SmartCap panels incurred any damage, in under an hour, they could swap it out — back on the road, good as new.

Manufactured out of automotive-grade stainless steel, the EVOc is a brilliantly engineered commercial truck bed cap system. The steel side doors with the optional rear window Security Mesh provide incredible security for your truck bed. Plus, outfit your EVOc with SmartAccessories to build the ultimate commercial truck based on your cargo management needs.

FEATURES: (In addition to the key features on page 5)

Protection when you need it — easy access when you don't.

The Stainless Steel Side Doors on the EVOc are incredibly secure. Plus, the low profile latching mechanisms and heavy-duty gas struts enable you to open the door with just one finger.

Build it how you want it.

The SmartSystem of accessories lets you build the ultimate commercial truck. From SmartDrawers to the half or full size SmartBox, Load Bars, Contractor Rack, and more — organize your commercial truck bed exactly how you want it.

Safe and secure.

When combined with the stainless steel doors, the optional Rear Window Security Mesh adds another layer of protection for your SmartCap EVOc.

Real attention grabber.

The SmartCap EVOc incorporates a high mounted third brake light that's a real attention grabber when slamming on the brakes to let Nana and her lil Tater shuffle across the intersection.

RSI SMARTCAP™

SMARTTRAY & SMARTCAPXL

Built for hauling hay or surviving the apocalypse. **Your choice.**

Peering through heat waves coming up from the African plains, you see it — a rugged-looking truck with a SmartTray System. Like something out of Mad Max, the offroad truck sports a SmartTray with a SmartCapXL sitting atop. Spare tires, jerry cans, an ax, and shovel attached. His message, fully received. “Bring on the apocalypse Buddy Boy, I’ve never been more ready!”

The SmartTray is built to take heavy-duty abuse while still delivering the ultimate in truck bed organization. From the frame up, its design maximizes space with a drawer and bins for containing your stuff. Combined with the SmartCapXL it can also deliver a whopping 74 cubic feet of water-tight, dust-free, fully enclosed storage. Add to that it’s seamless compatibility with SmartAccessories, and you have truck bed nirvana.

FEATURES:

Maximize your bed from the frame up.

Designed to maximize the space around the frame and tires, the SmartTray comes with built-in bins and a heavy-duty telescopic sliding drawer that can handle heavy loads.

Get to it.

One of the largest caps ever constructed for a light-duty truck, the SmartCapXL provides 74 cubic feet for a mid-size truck. Plus, the large side doors let you access the entire tray from either side.

Hang it and go.

The back wall of the SmartCapXL includes universal brackets for mounting spare tires, jerry cans, ladders, shovels, etc. If it can be mounted, just hang it and go.

Mount up.

Sleekly designed into the top of the SmartCapXL, our integrated Roof Rails allow you to utilize other SmartAccessories for mounting roof-top tents, bikes, kayaks, ladders — you name it. Plus, if you already own a rack system, no problem. Their universal design allows you to mount just about anything.

SMARTACCESSORIES

 **BE SMART IT'S HOT!**

The smart way to build a bed.

SmartKitchen : Camp stove, cutting board and secure storage for the included dishes, cookware, spices, etc.

The SmartSystem of accessories lets you organize your truck bed to fit your life. Drop a SmartKitchen into one Gullwing Door for pasta bolognese under El Cap and a SmartBox in the other to keep your tools organized. Whatever you're after, build your truck bed exactly how you want it.

Full SmartBox : Fills the entire side opening and provides mounting brackets to secure cargo.

Half SmartBox : Fills half of the opening—leaving the other half to access your bed and cargo. **SmartDrawer** : Organize and safely store tools and equipment.

SECURITY MESH

SMARTLIGHT

SMARTTABLE

Security Mesh (EVOc) : Adds another layer of rear window protection for your SmartCap EVOc. **SmartLight** : The powerful rechargeable LED SmartLight, magnetically mounts to shed light right where you need it. **SmartTable** : Stainless steel construction. Includes a mounting bracket for storing the table on the interior roof of a SmartCap.

CONTRACTOR RACK

LOAD BAR KIT

SMARTRACK

PLATFORM RACK

Contractor Rack : Heavy-duty roof rack with rollers and ample tie-downs for securing your load. **Load Bar Kit** : Great for mounting tents, bikes, ladders, etc. **SmartRack** : Drop down roof rack for making loading and unloading of cargo a snap. **Platform Rack** : Creates a large surface and ample mounting points to secure cargo.
